Bachelor Of Computer Application (BCA)

Part -1 (Paper-2)

– Hira Kumar

Use Version - Microsoft Office 2016 for Windows

❖ **Creating a New Document**

Step1 → Click the File tab.

Step2 → In the Backstage View, click New.

Step3 → Click Blank Document.

❖ **rand Command**

- In Ms-word, rand stands for Random.
- Rand() is a built in command in ms-word that generates random sample text automatically.
- It is mainly use for practice, testing formatting and filling pages.

(ऐसा command जिसे use करके हम random text automatically insert करते हैं)

Syntax/formula → =rand(p,s) where p= generate paragraph & s = how many sentence in this paragraph.

Paragraph = End of Enterkey , & Sentence = End of full stop(.)

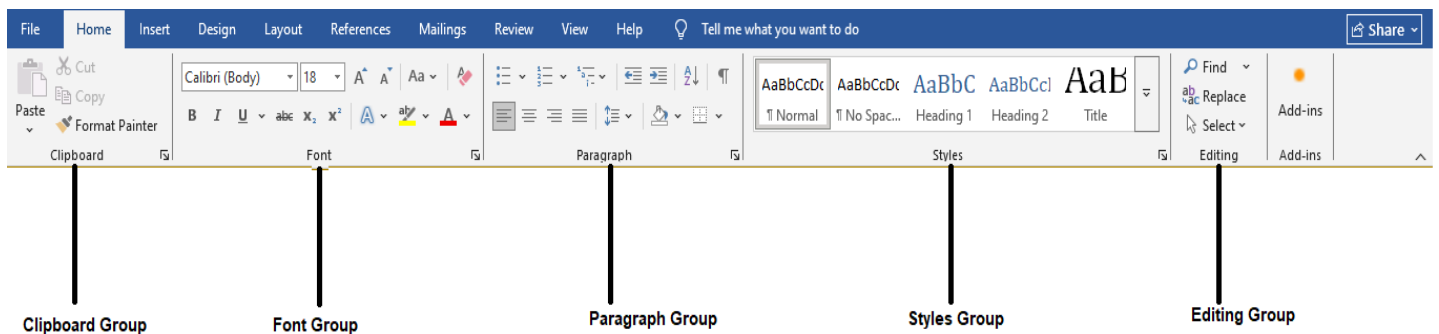

Example → =rand(50,40) Enter press (इसका मतलब 50 paragraphs और प्रत्येक paragraphs में 40 sentence)

Note :- MS-Word Not case-Sensitive

❖ Setting up Your Document

- When you begin creating a new Word document, there are certain aspects of the document that you should consider, such as margin settings, fonts and styles, and line spacing. Making these choices before you begin typing could save you time editing your document later on.
