Use Version - Microsoft Office 2016 for Windows

❖ **What is Microsoft office ?**

- **Micorsoft office**, or **MS Office**, or simply **Office** is an application software suite(पैकेज) developed by Microsoft.
- It is used for office works such as –
 - ✓ Writing documents
 - ✓ Making calculations
 - ✓ Creating presentations
 - ✓ Managing database
 - ✓ Sending emails
- **The suite currently includes –**
 - ✓ A word processor (Word)
 - ✓ A spreadsheet program (Excel),
 - ✓ A presentation program (PowerPoint),
 - ✓ A note-taking program (OneNote),

- ✓ An **email client (Outlook)**, and
- ✓ A **database management system (Access)**
- Microsoft Office previously offered desktop, mobile, and web applications; out of these, only the desktop suite is still maintained.
- Written in C++ (back-end)
- Operating system Microsoft Windows
- Available in 102 language

❖ **Beginning of Microsoft Office**

1. First windows version in 1990

Microsoft released office for windows

This made office very popular worldwide.

2. Office 95 (1995)
3. Office 97 (1997)
4. Office 2000 (2000)
5. Office XP/2002 (2001)
6. Office 2003 (2003)
7. Office 2007 (2007)
8. Office 2010 (2010)
9. Office 2013 (2013)
10. Office 2016 (2015)
11. Office 2019 (2018)
12. Office 2021 (2021)
13. Office 2024 (09 Dec 2025) Latest – One time license. It is also know as Office LTSC 2024 (business use)

Microsoft 365 (2021)

- Cloud-based productivity suite
- Before know as Office 365
- Software + Cloud services + security (all in one)
- No fixed version, Continuous updates / Subscription based model (monthly/yearly)

MS - WORD

The Word 2016 Interface

The Word 2016 interface is very similar to the Word 2013 interface, with a few minor changes.

❖ What is Ms-Word

- Ms-word is a word processing application. It is used for creating, editing, formatting, and printing text documents.
- Extension of ms word is - **.docx**
- Uses of MS Word
 1. Typing Documents
 2. Preparing Assignments & Projects
 3. Resume/ CV Creations
 4. Formatting Text (change font,size,colour,bold,....)
 5. Inserting Objects (images, tables,Shapes,charts,....)
 6. Creating Official Documents
 7. Spelling & Grammar Checking
 8. Printing Documents
 9. Mail merge
 10. Collaboration & Sharing

❖ How to Open MS-word

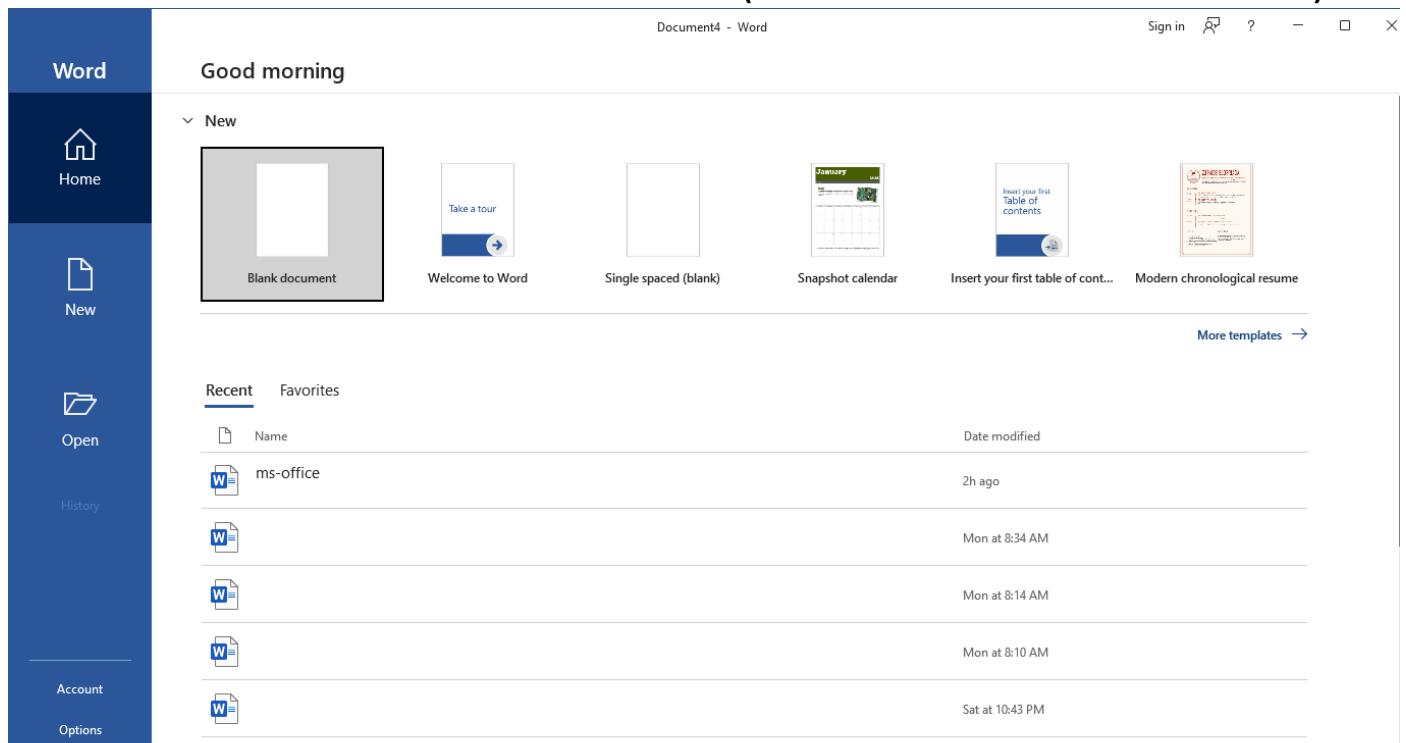

- Step1 – Click Start Button
- Step2 – Search/type → Word
- Step 3 – Click and open

OR

- Step1 – Click Windows key + R
- Step2 – Type → winword

- Step3 – click OK and open

Welcome Screen → 1st View when do open Ms- word, which screen see is called Welcome screen. (available after 2013 versions).

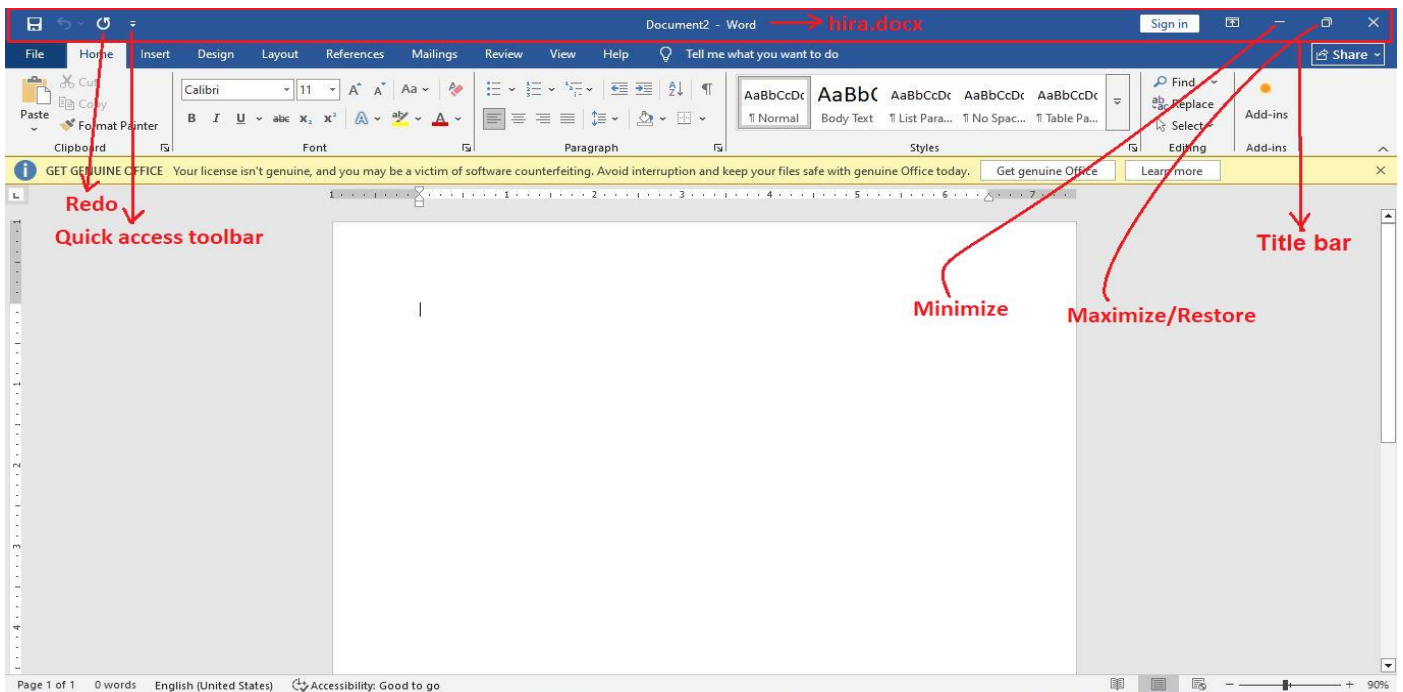

Function available in Welcome screen –

Blank document, Readymade template, Account, Option, New, Open

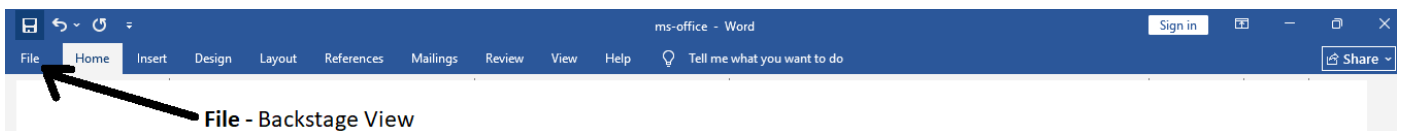

❖ Title Bar

- Title Bar in Ms word is the horizontal bar at the top of the word windows. It displays important information and provides basic window controls.
- ✓ Document Name (Show the name of the current document. E.g – hira.docx, Default name - Document)
- ✓ Program Name (यहाँ word प्रोग्राम open हैं)
- ✓ Quick access toolbar (shortcuts like Save, Undo and Redo)
- ✓ Windows Control Buttons (Right side) { minimize (-), Maximize(□), close(x)}
- Minimize – Send the window to the taskbar.
- Maximize/Restore – Enlarges or Resizes the window.
- Close - Close Microsoft word.

❖ Backstage View

- When you click the File Tab in Ms word, it opens a special screen called Backstage View.
 - The following explains how to enter the Backstage View after creating your document:
1. Click the File tab.

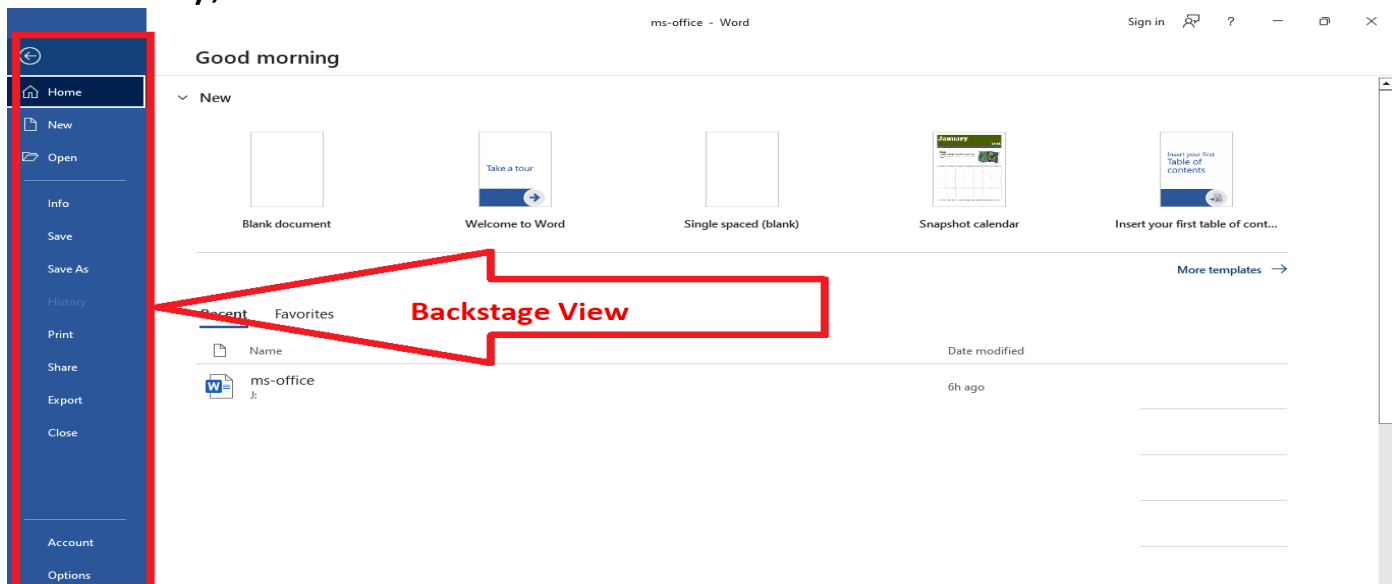

2. From the Backstage View, you can perform the following actions:
 - a. **Back** - Takes you back to edit your document.
 - b. **Info** - Obtain information about your documents.
 - c. **New** - Create a new document from a blank or pre-formatted template (**Ctrl + N**)
 - d. **Open** - Open a document. (**Ctrl + O**)
 - e. **Save** - Save the document to keep your edits. (**Ctrl + S**)
 - f. **Save As** - Resave a saved document as a different filename or file type. (**F12** or **Alt + F + A**)

Note:- save/save As to provide many file extensions-

- ✓ .docx = Default word file extensions
- ✓ .doc = Old world version
- ✓ .pdf = For Document share (not edit easily)
- ✓ .rtf = Rich text Format (open file in different software)
- ✓ .txt = Plain text

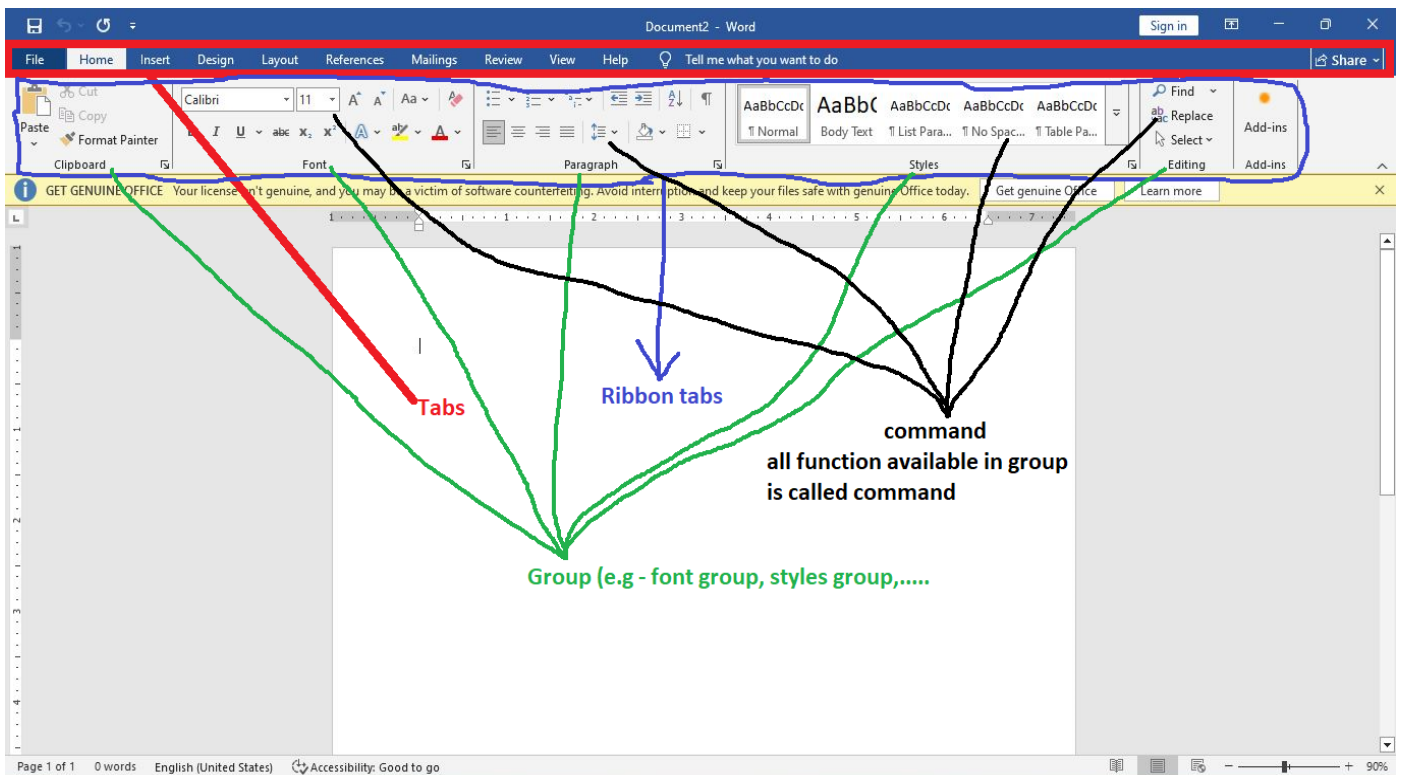

- ✓ .html/.htm = For Web page
- ✓ .odt = Open document text (For Libre office/open office)
- g. Print** - Print documents and see a preview of your document.
(Ctrl + P)
- h. Close** - Close the document
Ctrl + W or Ctrl +F4 = File close
Alt + F4 = Program close
- i. Export** – Change format (e.g. – pdf,...)
- j. Account** – See Product information, activation, privacy, Sign-IN,.....
- k. Options** – Customize Ribbon, quick access tool bar and so many,.....

❖ Tabs, Ribbon, Groups and Command

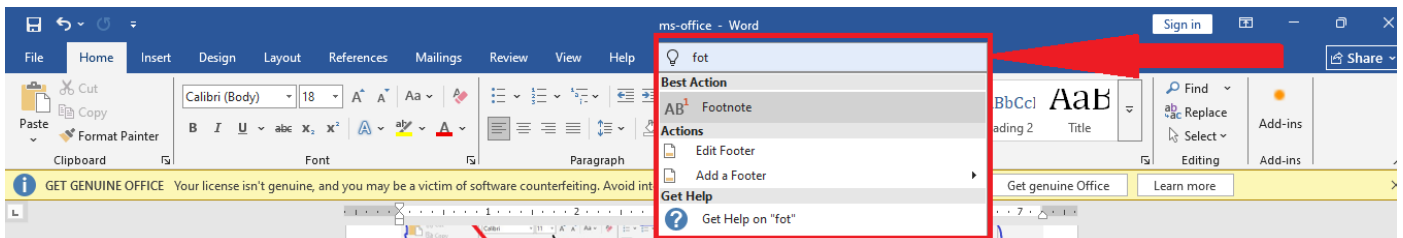

- **Tabs** → Home, Insert, Design, Layout, References, Mailing, Review, View and Help.
- **Ribbon** → Ribbon is the horizontal strip at the top of the MS word window that contains Organizes commands and groups.
- **Groups** → A Group is a collection of related command placed together within a tab on the ribbon. (E.g. – Home Tab → Font Group → Bold, italic, Underline,.....command हैं)

नोट :- (tabs को ही Menu, ribbon को menu bar एवं groups & commands को drop-down list कहते थे पहले office 2003 तक, office 2007 से tabs, ribbon,....कहने लगे |)

❖ Tell Me what you want to do

- It is a search box in Ms word used to quickly find commands.
- e.g. – Bold लिखने पर Bold,.....

❖ Ruler /scale

A tool used to adjust margins and alignment.

❖ Cursor

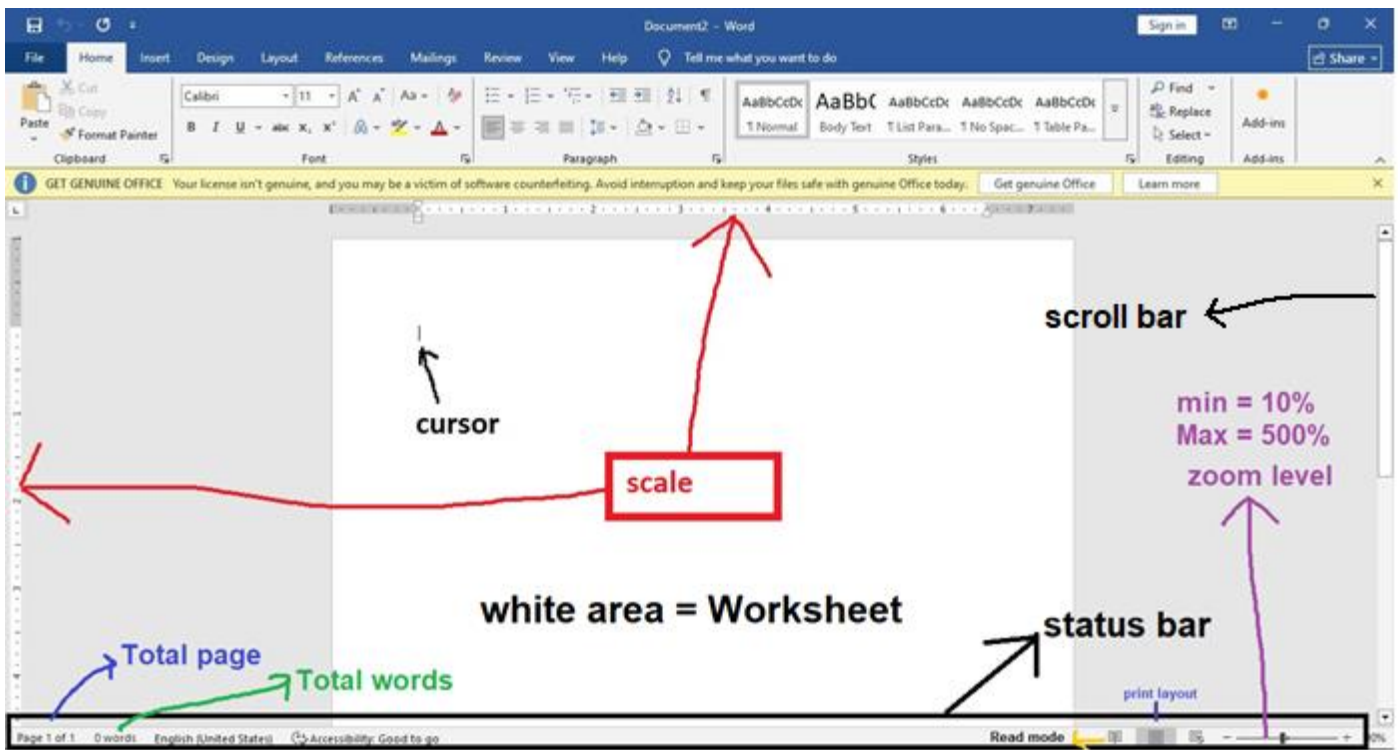

A blinking line showing where text will appear.

❖ Status Bar

Status Bar is the bar at the bottom of MS word that shows document information.

❖ Zoom Level

- Zoom level is the percentage of magnification of a document on screen. In **MS word becomes minimum zoom = 10% & maximum Zoom = 500%**
- Page Zoom in & Zoom out (By mouse → Ctrl + mouse wheel , By Keyword → ctrl + '+' '-' , near of backspace key.)

❖ Taskbar

- Taskbar is a no any part of msword. It is a component of the windows Operating system, not of Ms word.
- The taskbar is a bar on the desktop that shows running applications and provides quick access to system notifications.
- Taskbar shows – (i) Start button (ii) Icons of running/open programs (iii) quick launch icons (iv) notification area (time, date, battery, volume, network)
