

S.P.M College, Udantpuri

Bachelor Of Computer Application (BCA)

Part -1 (Paper-2)

– Hira Kumar

Use Version - Microsoft Office 2016 for Windows

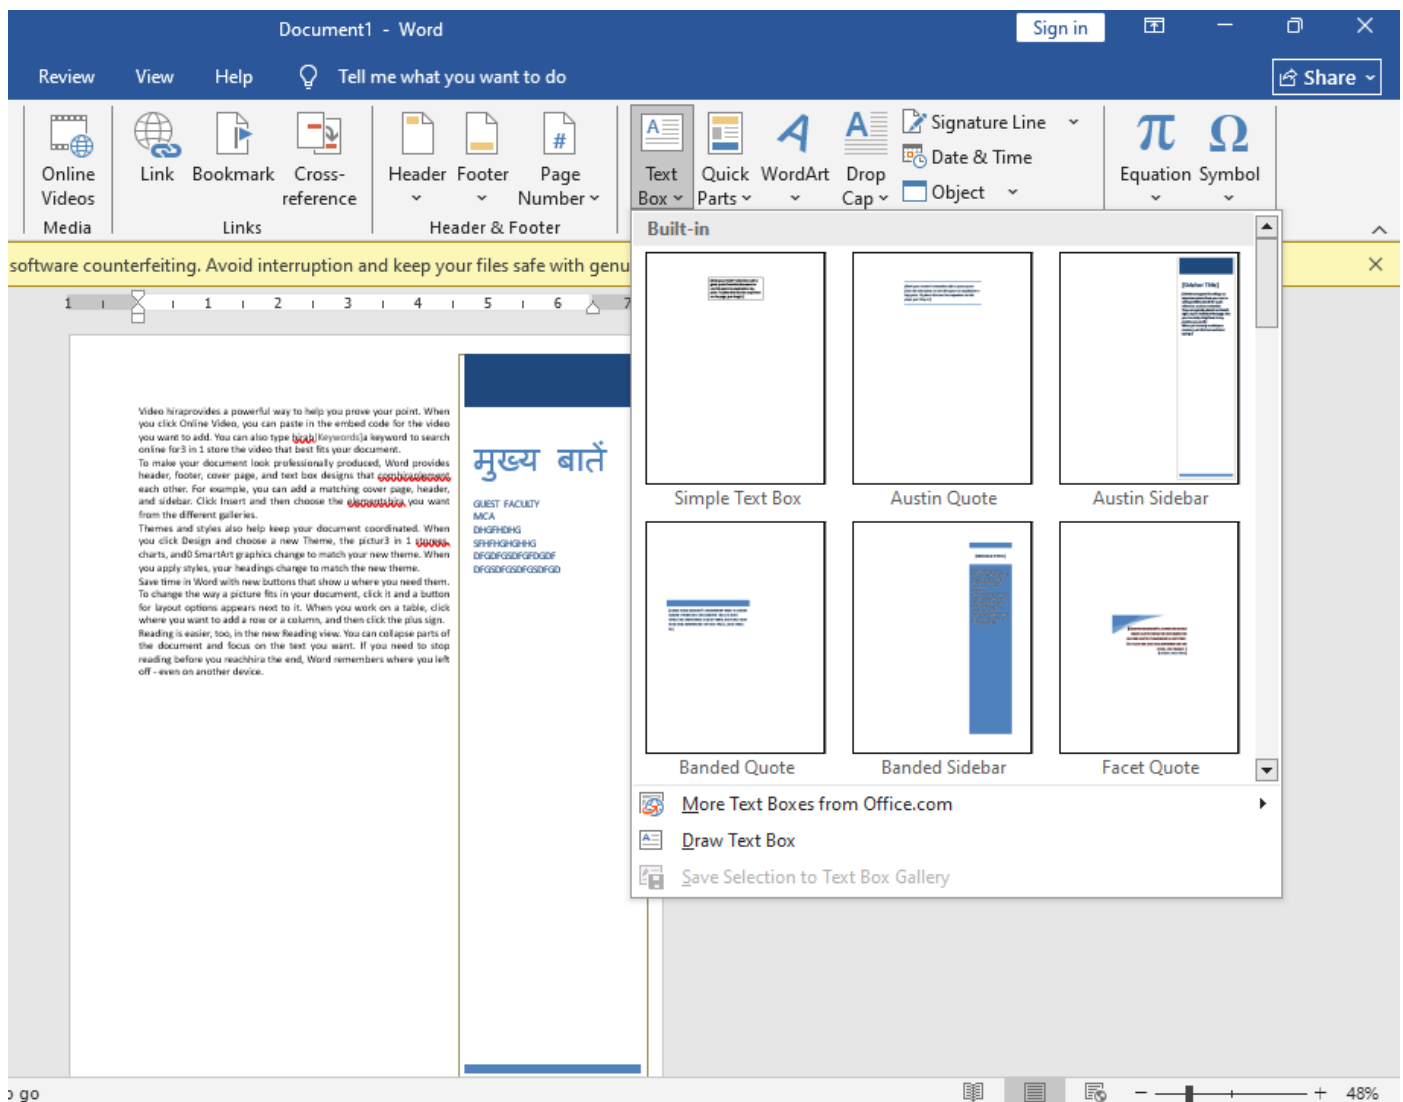

Insert Tab

❖ Text Group

- The text group lets you insert special text objects like text boxes, wordart, signatures, date/time and embedded files.

Text Box

- Inserts a movable box where you can type text separately from the main document.
- Uses:→ Side notes, Highlights, quotes, Advertisements
- Options Inside :→ Built-in designs and Draw text box (custom shape)

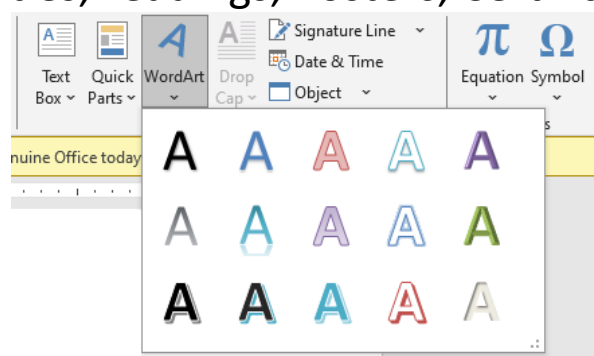

Quick Parts

Store and reuses pieces of content.

- Auto text :→ Pre-saved text that you can insert quickly.
- Document properties :→ Insert fields like author name, title, company, etc.
- Field :→ Insert dynamic data (page number, date, filename.)
- Building blocks organizer :→ Manages saved items.

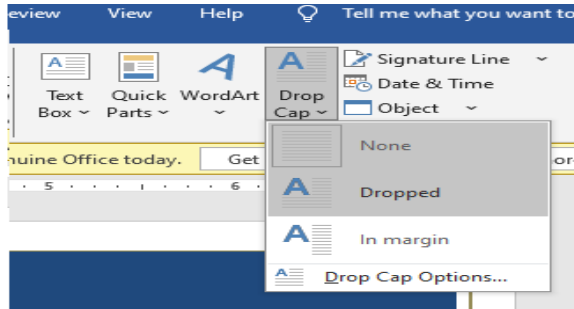

WordArt

- Adds decorative, stylish text.
- Uses :→ Titles, Headings, Posters, Certificates,

Drop Cap

- Makes the first letter of a paragraph large.
- Two types drop → (i) Dropped – inside paragraph and (ii) In margin (outside paragraph)
- Uses:→ Books, magazines, articles.

Video hira provides a powerful way to help you prove your point. When you click Online Video, you can paste in the embed code for the video you want to add. You can also type hirah[Keywords] keyword to search online for 3 in 1 store the video that best fits your document.

To make your document look professionally produced, Word provides header, footer, cover page, and text box designs that complement each other. For example, you can add a matching cover page, header, and sidebar. Click Insert and then choose the elements you want from the different galleries.

Signature Line

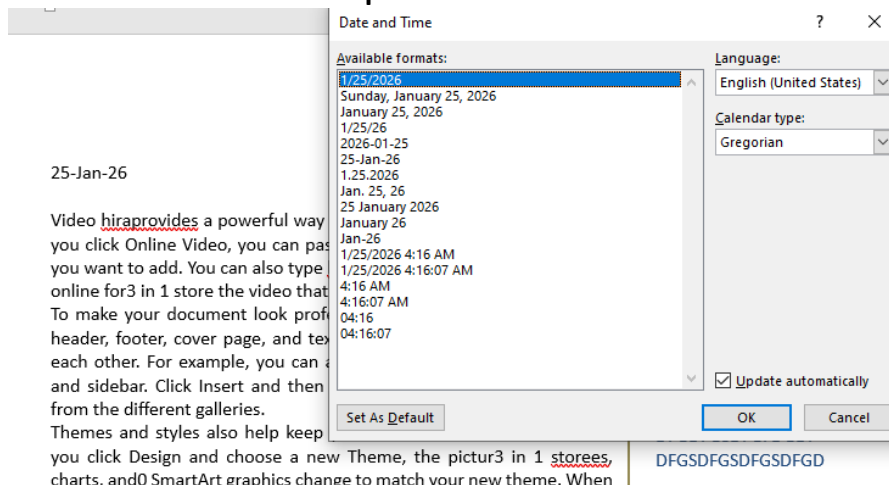

- Adds a digital signature line.
- Uses : Official documents, forms and agreements.

Data & Time

- Insert current date and/or time.
- In command best feature update automatically – keeps changing when document opens.

Object

- Inserts another file or creates a new embedded (किसी file या object को दूसरे डॉक्यूमेंट के अंदर रखना) object.
- Examples : Excel sheet, Powerpoint slide, PDF, Another word file.
- When insert any file e.g. pdf then insert/view only first page not show all pages. If you want all page then double click on this file.

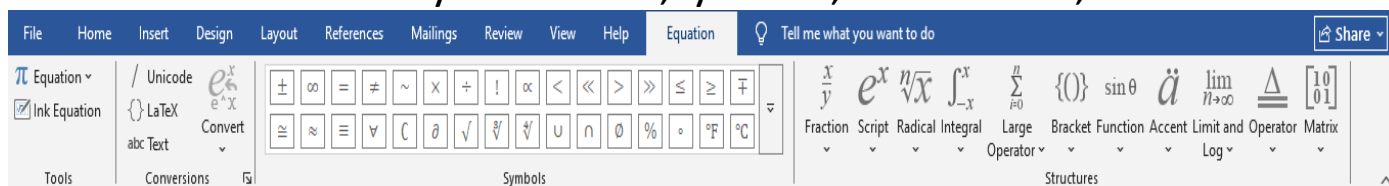

❖ Symbols Groups

- The group is mainly used to insert special characters, mathematical signs, currency symbols, arrows, Greek letters, etc. Which are not available directly from the keyboard.

Equation

- Used to insert mathematical equations and formulas into the document.
- Insert ready-made equations like :- Area of circle, Binomial theorem, quadratic formula, trigonometric formula,..... many and also available create custom equations.
- When click equation command and choose any function then open new tab, its called Equation tab.
- You can insert many structures, symbols, conversions,.....

e.g. $\rightarrow 27^{\circ}\text{C}, 2^3 = 8, A = \pi r^2, \sqrt{9} = 3, A = \pi r^2 \tan \theta = \frac{\sin \theta}{\cos \theta}, A = \pi r^2$

Symbol

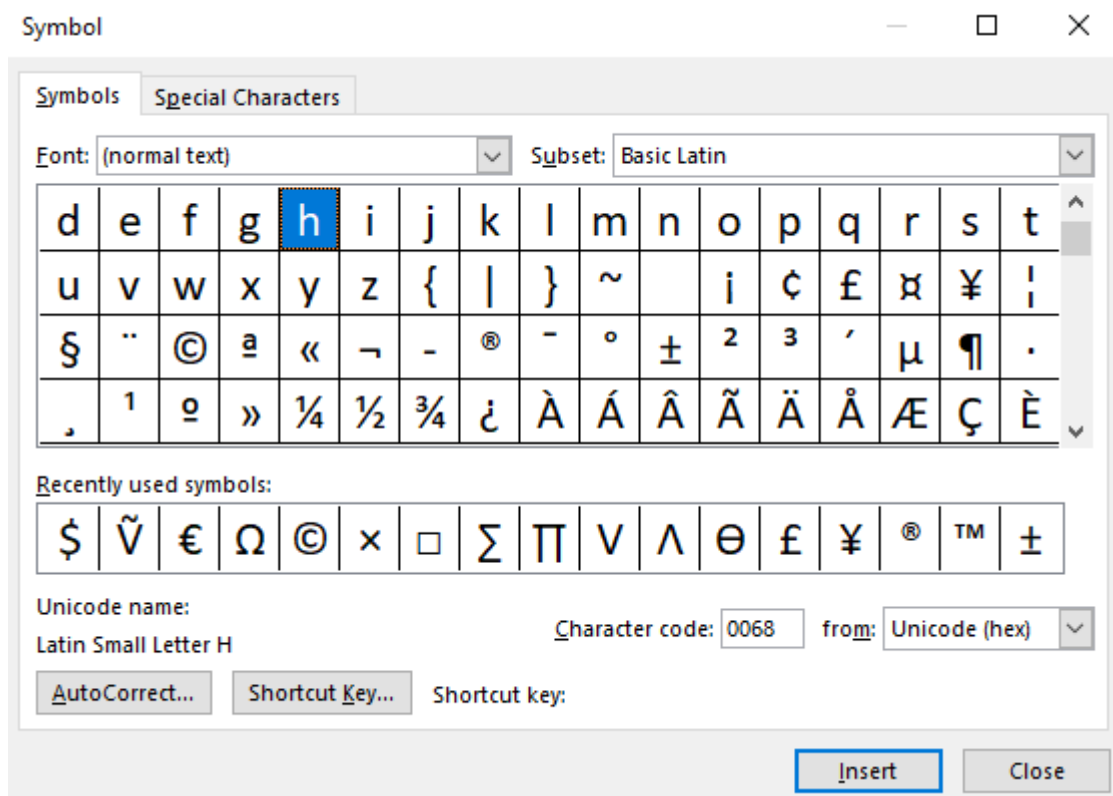

- Used to insert special characters or symbols such as :- ©, Ω, €, Ñ, \$,....
- When you click symbol,you get two options:-

a) Recently used symbols

- Shows symbols you inserted recently for quick reuse.

b) More symbols

- Opens the symbol dialog box, where you can choose different fonts insert such as: Mathematical symbols, Greek letters, Currency signs, Technical symbols,.....more and you can see in Character code(ASCII code) and Unicode value.
- You can modify shortcut key for special symbol reuse.
