Bachelor Of Computer Application (BCA)

Part -1 (Paper-2)

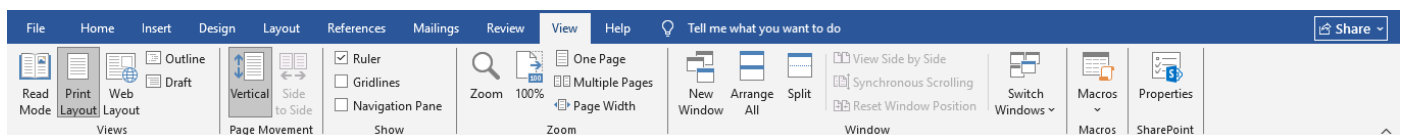

– Hira Kumar

Use Version - Microsoft Office 2016 for Windows

View Tab

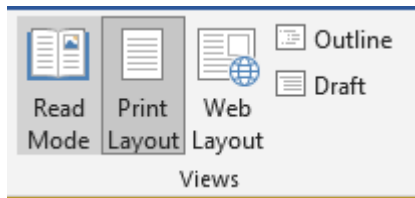

- In Ms-word, the view tab controls how the document is displayed on screen-it doesn't change the content itself, only the way you see and work with it.

Here all group and command are explain below.

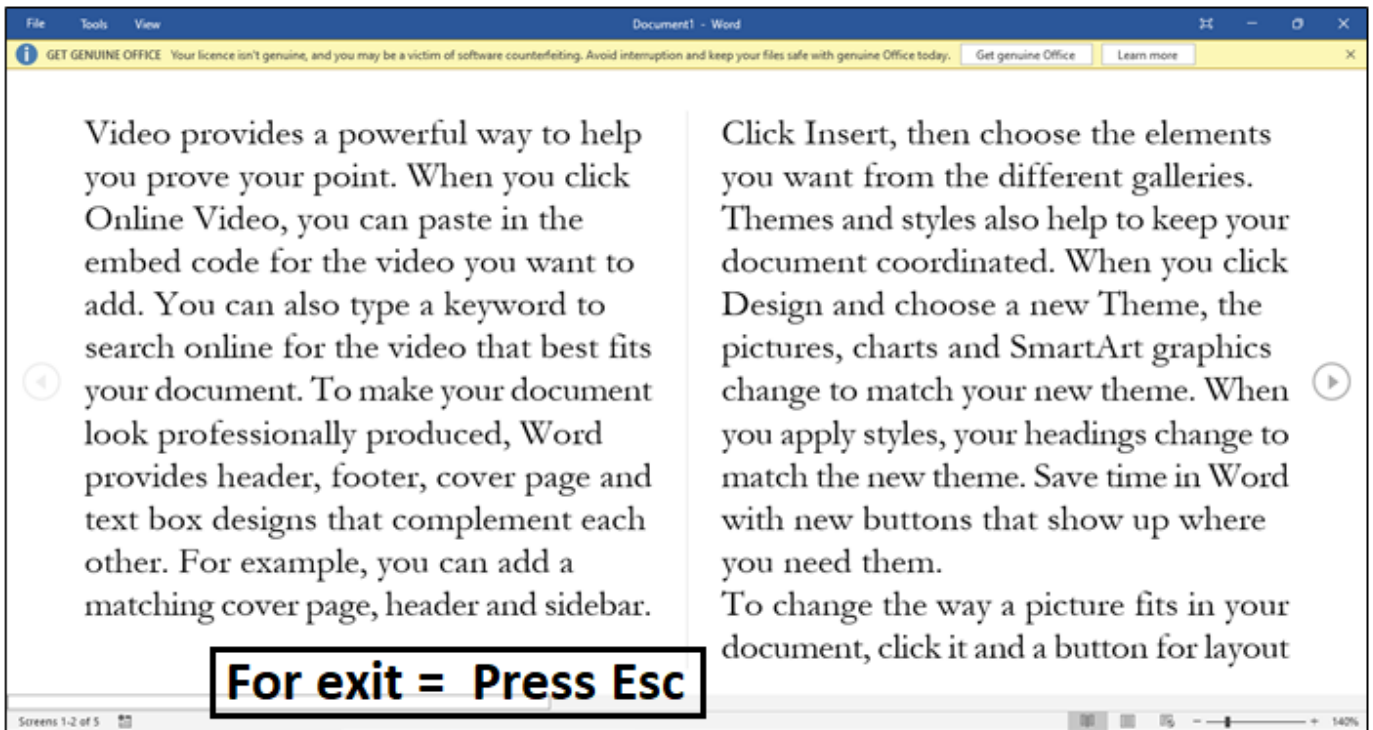

1. View Group

- This group lets you switch b/w different document viewing modes.

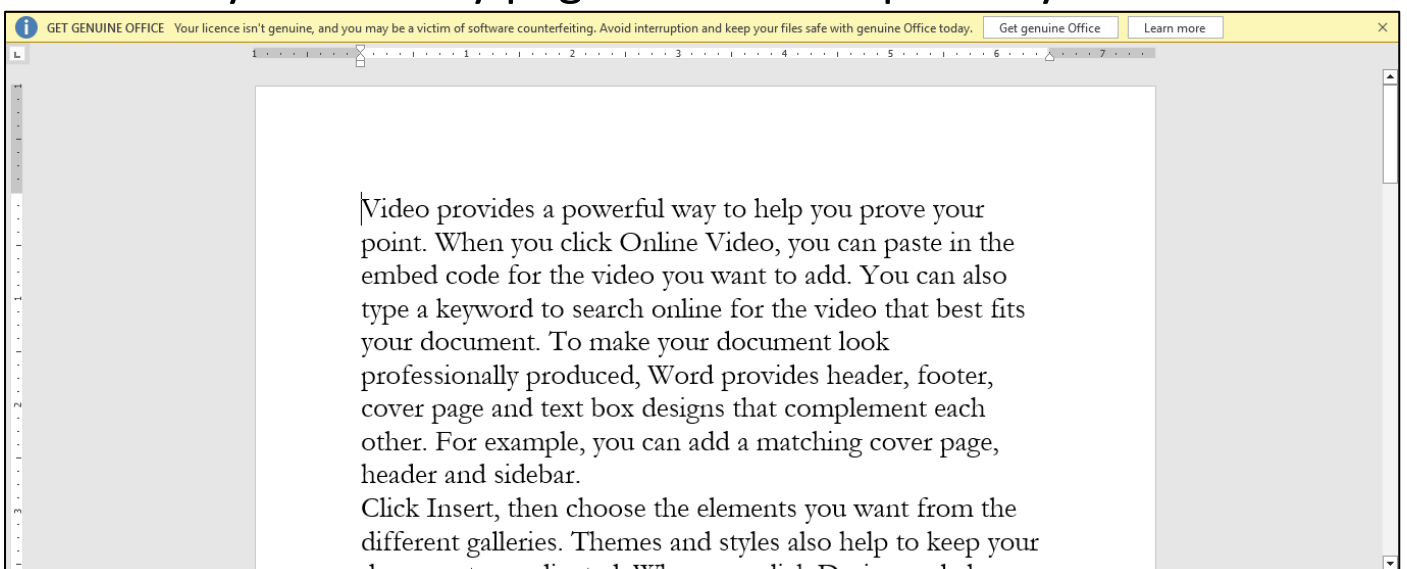

Read Mode

- Best for reading documents.
- Hide most editing tools.
- Shows pages like a book.

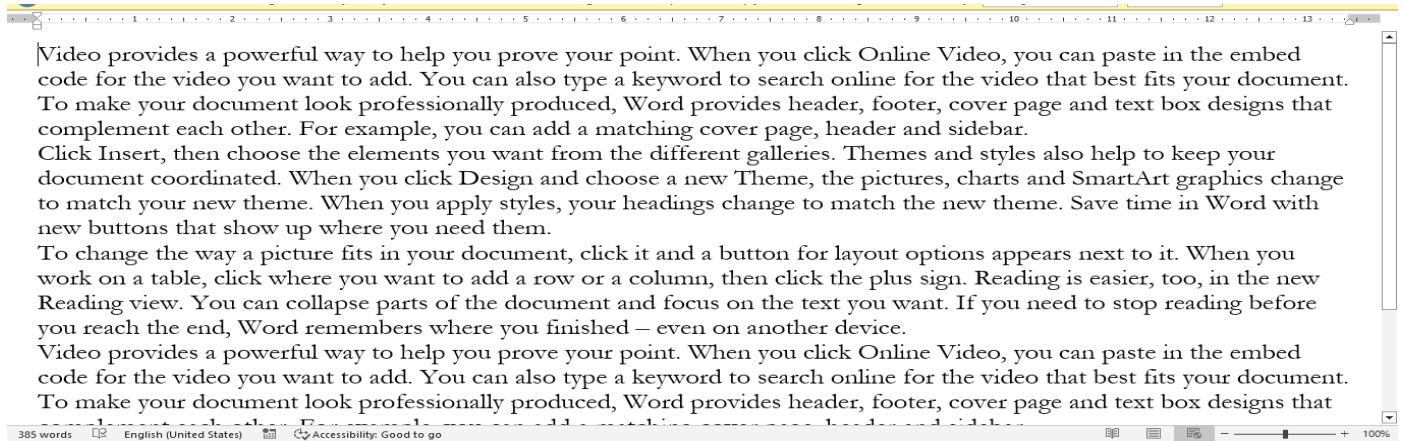

Print layout

- Shows how the document will look when printed.
- Displays margins, headers, footers, images, etc.
- By default my page becomes in print layout.

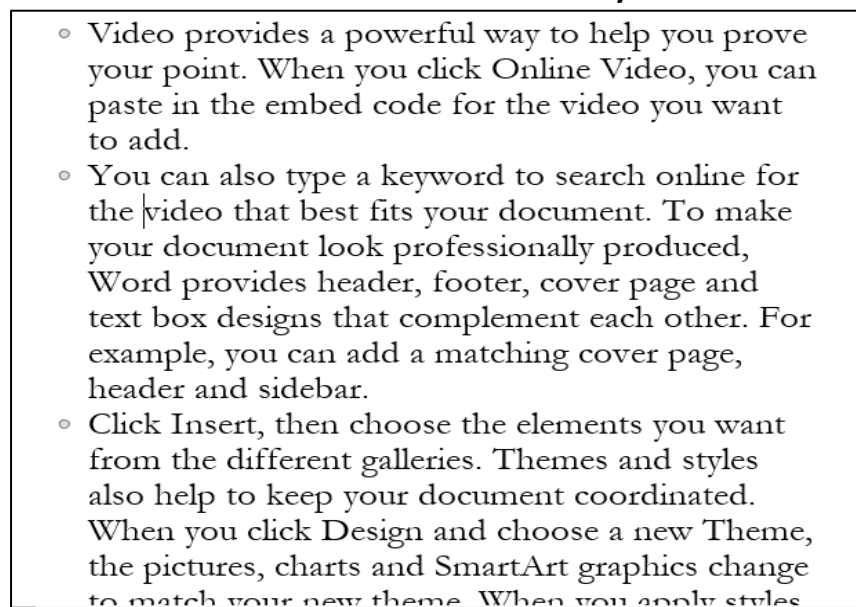

Web layout

- When jump/goto print layout to web layout then my content show in full screen.
- Shows the document as a webpage.
- Removes page breaks.
- Useful for online content.

Outline

- Displays document structure using headings.
- Helpful for long reports/books.
- You can move sections easily.

Draft

- Simple text-focused view, No page break.
- Hides headers, footers, and most graphics.
- Useful for fast typing/editing.

2. Page movement

- Page movement group, you control how pages scroll on the screen.

It has two command.

Vertical

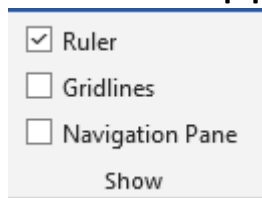

- Pages move up and down continuously.
- This is the default view.

Side to side

- Pages move left and right.
- Show one page at a time like a book.
- Click side to side command OR Read mode command.

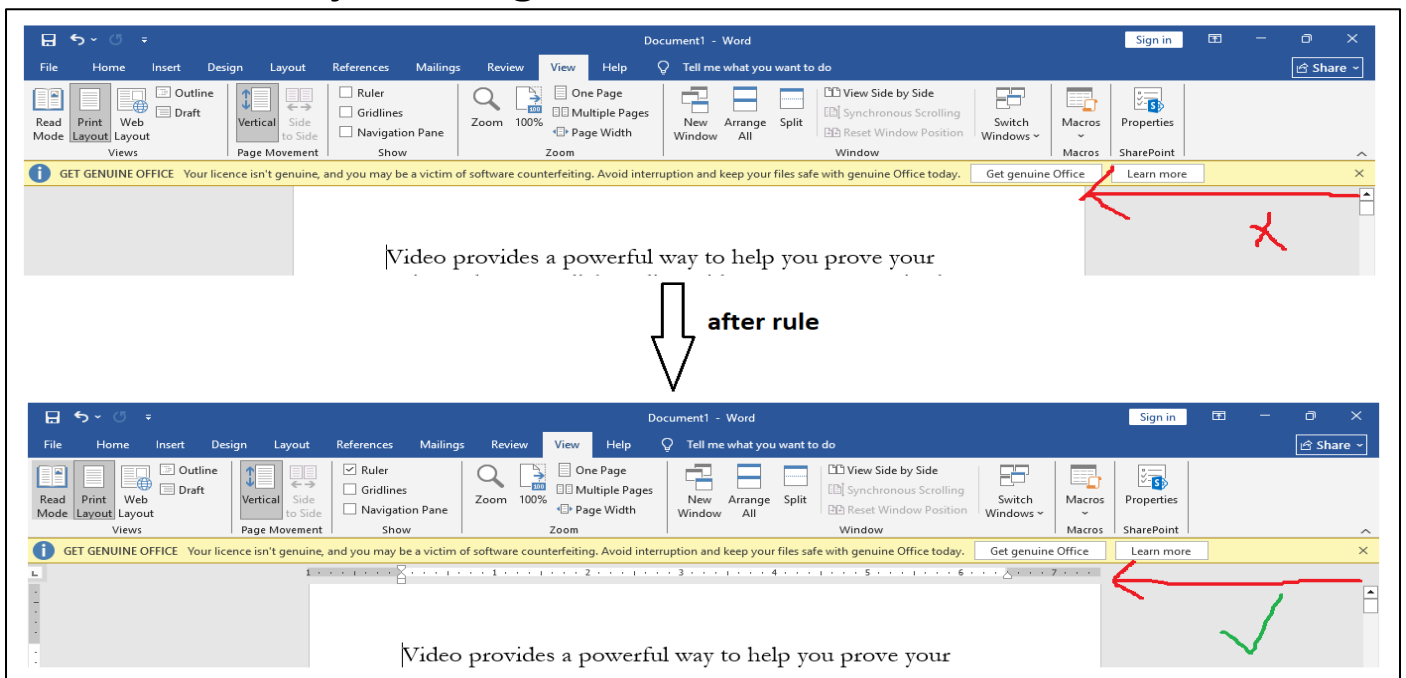

3. Show Group

Controls what extra items appear on the screen.

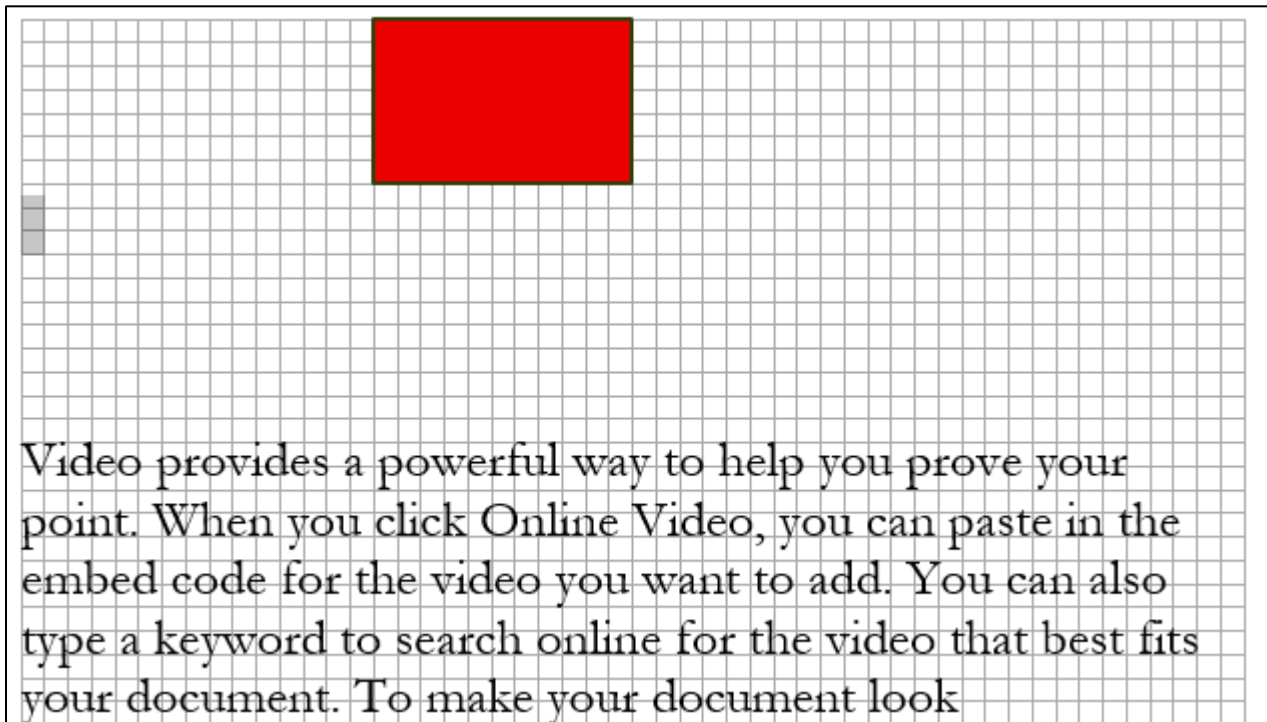

Ruler

- Shows horizontal and vertical rulers.
- Used to adjust margins, indents, and tabs.

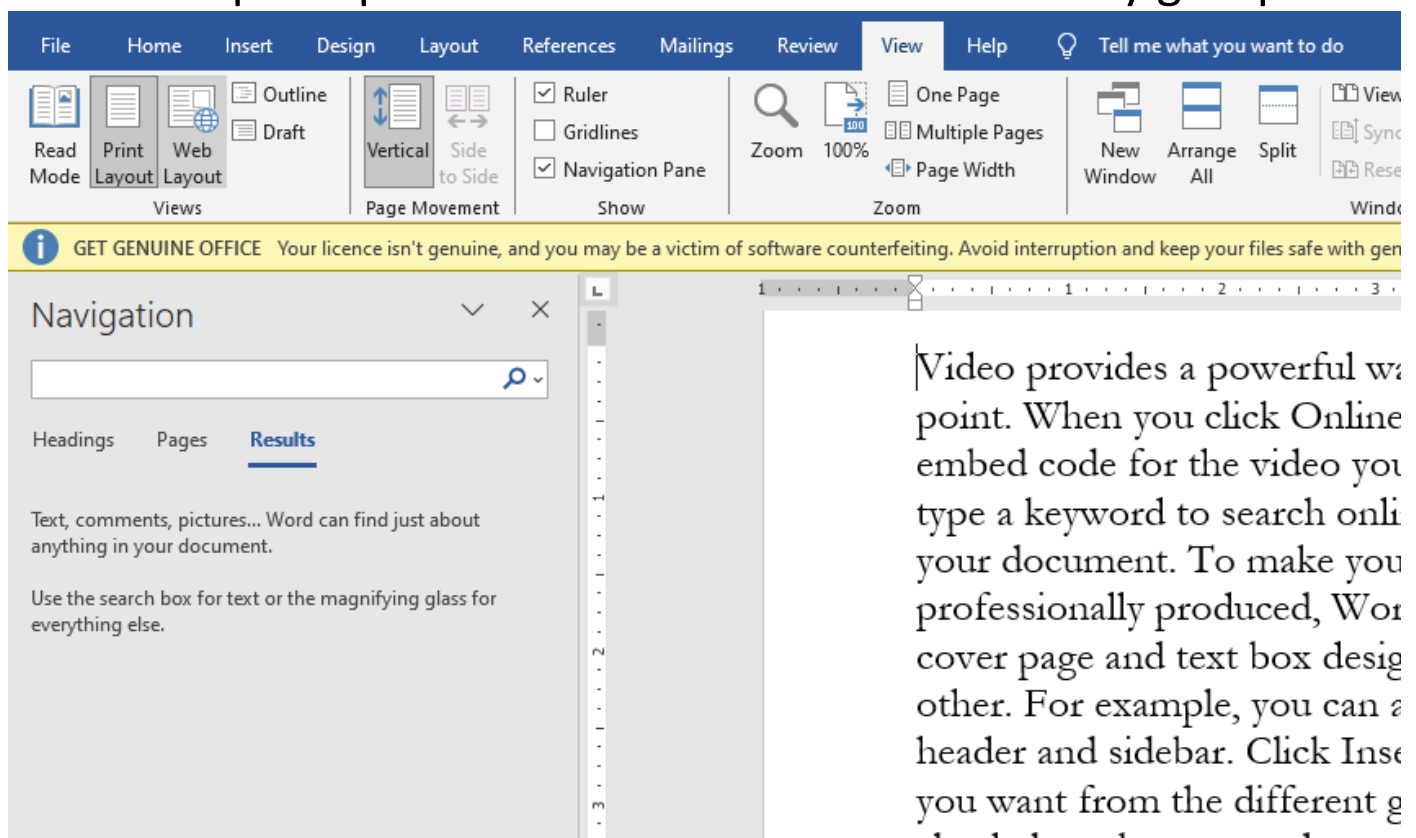

Gridlines

- Displays faint grid lines.
- Helps align objects, pictures, shapes.

Navigation Pane

- Opens a left panel to : Search text, Jump b/w headings, and browse pages.
- This option present of review tab in accessibility group.

4. Zoom Group

Used to change how large or small the document appears.

Zoom

- Opens a dialog box to choose percentage (e.g, 100%,150%,...)
- In Ms-word minimum zoom out = 10% and Maximum zoom in = 500%.

100%

- Resets zoom to normal size.

One page

- Fits one full page on screen.

Multiple pages

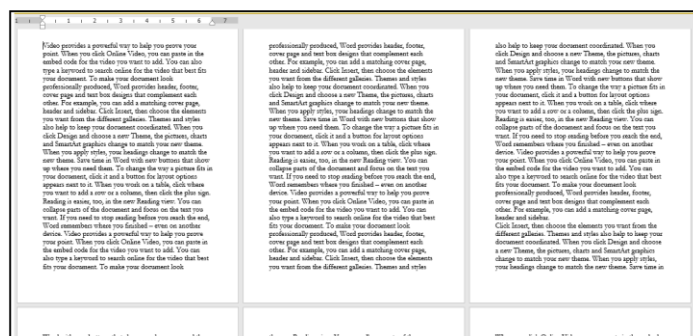

- Shows two or more pages at once.

Page width

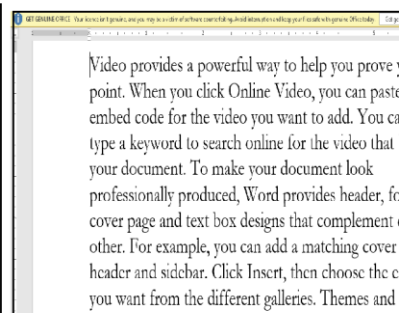

- Fits page width to the screen.

one page

Multiple pages

Page width

5. Window Group

Used to manage multiple word documents.

New window

- Opens another window of the same documents.

Arrange all

- Tiles all open word files side-by-side.

Split

- Divides the same document into two panes so you can view different parts.

View side by side

- Shows two documents next to each other.

Synchronous Scrolling

- When side by side is ON, scrolling one document scrolls the other.

Reset window position

- Restores default side-by-side layout.

Switch windows

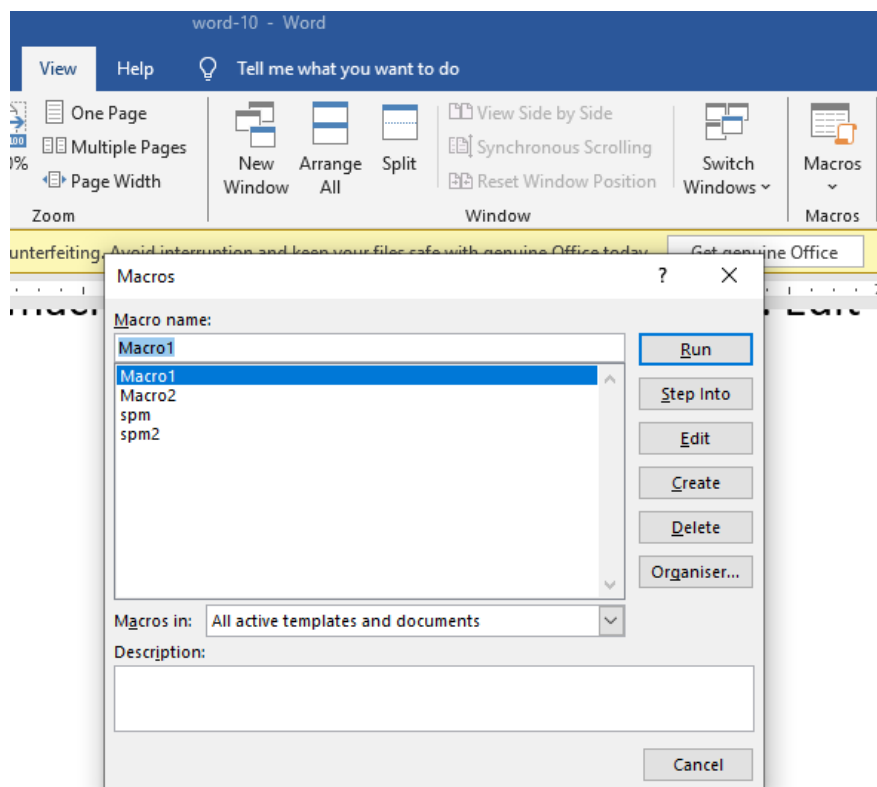

- Quickly move b/w open documents.

6. Macros Group

Used for automation

Macros

- View existing macros. Run a macro. Record a macro. Edit macros.
