

S.P.M College, Udantpuri

Bachelor Of Computer Application (BCA)

Part -1 (Paper-2)

– Hira Kumar

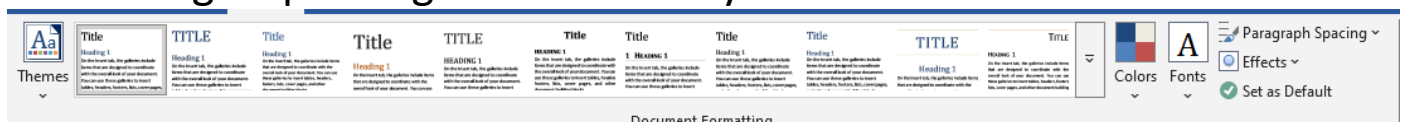

Use Version - Microsoft Office 2016 for Windows

Design Tab

- The design tab is mainly used to control the overall look style of the document – such as themes, colors, fonts, page background, and formatting effects.
- Design tab usually contains two main groups:
 1. Document formatting
 2. Page background

1. Document formatting

- This group changes the visual style of the whole document.

Themes

- Applies a ready-made design set to the document.
- A theme controls : Fonts, Colors, Effects, Paragraph spacing,

HIRA KUMAR

- Useful for professional reports and projects.

Colors

- Changes the color scheme of headings, shapes, smartArt, charts etc. Each theme has multiple color sets.

Fonts

- Changes the font pair used in the document: one font for headings and one font for body text.

Paragraph Spacing

- Adjusts space before and after paragraphs.

Effects

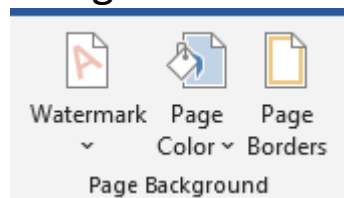

- Changes visual effects for: shapes, charts, smartArt,

Set as default

- Saves the current design formatting as the default style for new documents.

2. Page Background Group

This group controls the background of the page.

Watermark

- Adds faint text or picture behind content. It can also create custom watermark.

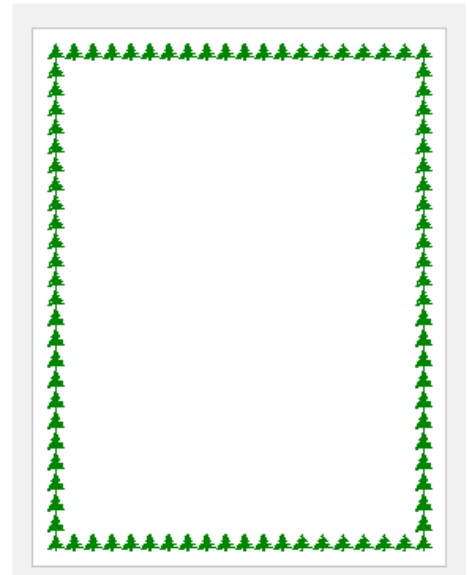

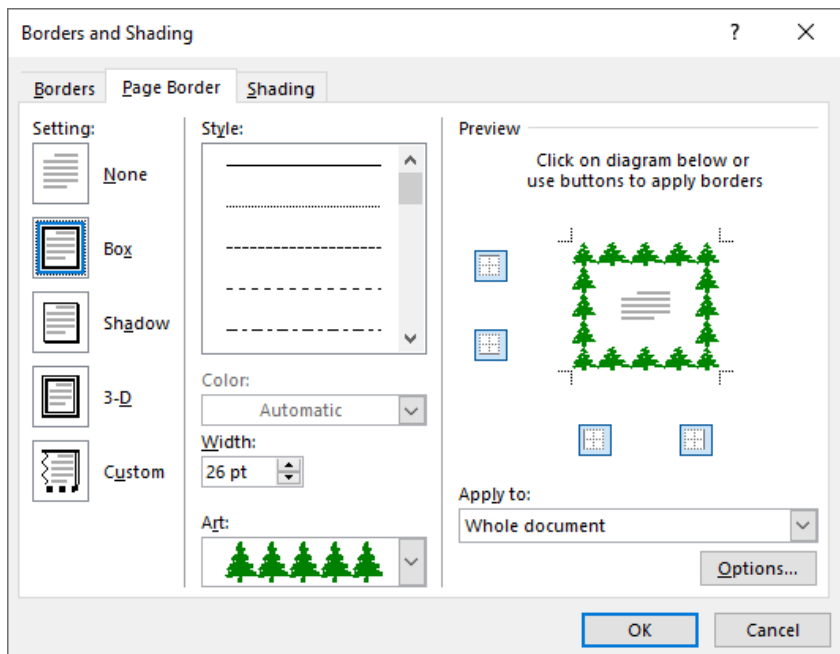

Page color

- Changes the background color of the page.
- It can add : Solid color, Gradient, Texture, picture background,...
- In page color is not a printable feature (default)

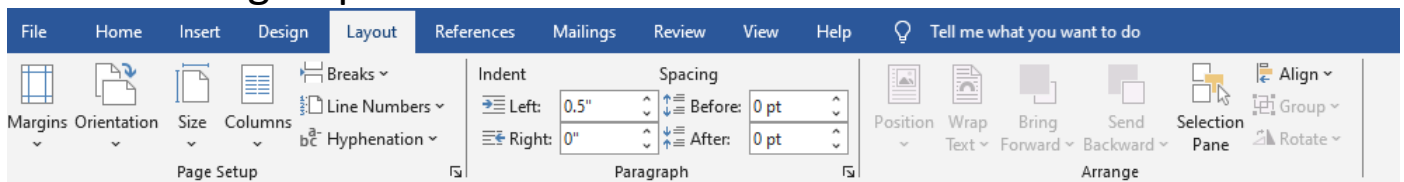

Page borders

- Adds borders around the page.
- It options : Box, Shadow, 3-D, Style, Color, width and Art border.

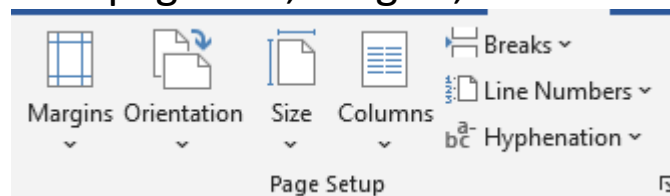

Layout Tab

- In ms-word, the layout tab (called page layout in older versions) is used to control how your document pages look and print.
- Total 3 groups available in this tab.

1. Page Setup Group

- This group controls page size, margins, orientation, and columns.

Margins

- Sets the space b/w text and pages edges.
- Example : Normal, Narrow, Moderate, Custom Margins.

Orientation

- Changes pages direction:- Portrait (Vertical) & Landscape (Horizontal)

Size

- Chooses paper size.

- Example : A4, Letter, Legal,.....

Columns

- Divides text into columns (Like newspapers).
- Many options are available :- One,Two,Three,Left, Right,....

Breaks

- Inserts page or section breaks.
- Types : Page Break, Column Break, Text Wrapping Break, Section Breaks (Next page, Continuous, Even/odd) .

Line Numbers

- Adds numbers to each line (useful in legal docs.)

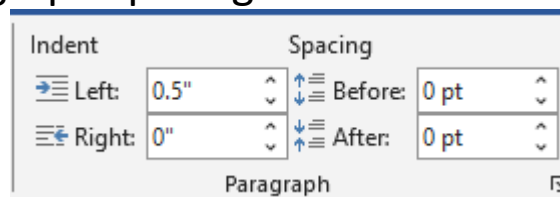

Hyphenation

- Automatically breaks long words at line end.

You can also type a keyword to search online for the video that best fits your document. To make your document look professionally produced, Word provides header, footer, cover page, and text box designs that complement each other.

2. Paragraph Group

- Controls paragraph spacing and indentation.

Indent left/right

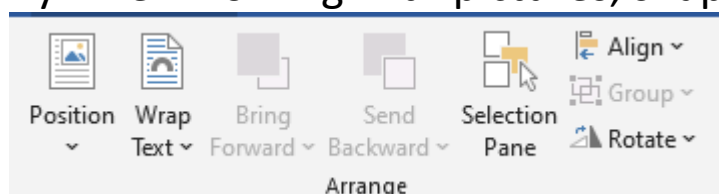

- Moves paragraph away from left or right margin.

Spacing Before / After

- Adds space above or below paragraphs.

3. Arrange Group

- Used manily when working with pictures, shapes, charts.

Position

- Places an object/image at a fixed spot on page.

Wrap text

- Controls how text flows around an image: Square, Tight, Through, Top and Bottom, Behind text, In Front of text.

Bring Forward/Send Backward

- Moves object above or behind others.

Selection Pane

- Shows all objects in document for easy selection.

Align

- Aligns multiple objects: Left, Center, Right, Top, Middle, Bottom.

Group

- Combines shapes/images so they move together.
- Select two or more image by selection pane and click group icon/command.

Rotate

- Rotates or flips an object.
